

Case Study – Strata Electric Vehicle Charging Roadmap

A luxury residential building with 104 apartments in City of Sydney

Challenges

- The Owners Corporation (OC) and Facilities Management were looking for scalable Electric Vehicle Charging solutions
- The OC did not understand the needs of residents in regards to planning for a future of electric vehicles.

Solutions

An Electric Vehicle survey was conducted by Wattblock in 2017

An Electric Vehicle Charging feasibility study was done by Wattblock which provided multiple EV charging models for the building to consider

Outcomes

The OC gained extra insights regarding electric vehicle charging in their apartment block

71% survey participants indicated a preference for individual chargers

1 individual Electric Vehicle Charging station installed
