### **PURPOSE:**

The purpose of this report is to present Council with the Service Review Framework.

### **EXECUTIVE SUMMARY:**

- All Councils in NSW are required to undertake systematic reviews of their services under the Office of Local Government Integrated Planning and Reporting (IP&R) Guidelines.
- In response to this requirement and Council's ongoing commitment to continuous improvement, a draft Service Review Framework was developed and presented to Council's Executive Leadership Team (ELT) in July 2024.
- A pilot service review was then undertaken to apply and refine the draft framework. The updated framework (attached) was subsequently adopted by the ELT in February 2025.
- The framework is based on the UTS Service Review Guide and incorporates Kaizen and Design Thinking methodologies to build a Council-wide culture of continuous improvement through collaborative problem-solving, quick wins, and a service excellence mindset.
- Continuous improvement though the framework is viewed through the four dimensions of the Balanced Scorecard (learning and growth, internal processes, customer experience, and financial perspective) along with sustainability.
- The ELT has nominated three service areas for review for 2025-2026. These are Governance, Tree Management, and Environmental Health and Building Compliance.
- The proposed four-year Service Review Program is included in the draft Delivery Program 2025-2029 which is presented to Council in a separate report.
- A service review evaluation report will be provided to Council's Audit, Risk, and Improvement Committee (ARIC) and Council in November/December each year to summarise the benefits realised through implementation of service review recommendations.

| RECOMMENDATION:  1. THAT Council receive and note the Service Review Framework report. |  |  |  |  |

# **Background**

In July 2024, the Executive Leadership Team (ELT) endorsed a draft Service Review Framework with the intention that Council's (NSC) service reviews be undertaken internally by its Organisational Performance team, in collaboration with the relevant service unit. This approach allows impartiality to be maintained while engaging service units to identify their challenges and develop workable solutions.

Following a service review pilot in Q1 and Q2 of 2024-2025, the framework was refined and subsequently adopted by the ELT in February 2025. This report provides an overview of the main elements of the Framework.

### **Council services**

A service is an end-to-end process (or group of processes) that delivers a specific outcome to an internal or external customer. Some services are comprised of multiple activities that work together to deliver the outcome. These are referred to as service activities.

NSC currently has 16 service units (plus the Office of the CEO and Legal Counsel) that provide 74 services, with 205 associated service activities. The complete service catalogue is provided at the end of the attached Service Review Framework.

To achieve a wholistic and comprehensive understanding of the role and value of each service, reviews will generally occur at the service unit or service level. However, this framework can also be applied to reviews at the service activity level (if required).

# Proposed service review program

NSC will operate under a four-year service review program with a minimum of two reviews to be undertaken each financial year.

The following four-year service review program is proposed.

| Year    | Service Reviews                     |
|---------|-------------------------------------|
| 2025/26 | Corporate Governance                |
|         | Tree Management                     |
|         | Environment and Building Compliance |
| 2026/27 | Residential Waste and Recycling     |
|         | Parks and Gardens Management        |
| 2027/28 | Events                              |
|         | Sustainability Services             |
| 2028/29 | Trade and Fleet                     |
|         | Community Development Services      |

Figure 1: Proposed four-year service review program

# **Roles and responsibilities**

The table below outlines the key roles and responsibilities for delivering NSC's service reviews.

| Area  | Responsibilities   |  |
|---|--|--|
| Council   | <ul> <li>Adoption of Service Review (SR) program via adoption of<br/>the Delivery Program and Operational Plan</li> <li>Approval of recommendations that involve a reduction in<br/>a service or additional costs outside of the existing budget</li> </ul>  |  |
| Audit Risk & Improvement Committee (ARIC)   | Review progress updates and provide advice as required   |  |
| Executive Leadership Team (ELT)   | <ul> <li>Framework adoption</li> <li>Development of the schedule and program</li> <li>Define scope for each review</li> <li>Approval of recommendations that do not require Council approval</li> <li>Review of recommendations that require approval from Council</li> <li>Allocation of resources</li> </ul> |  |
| Service Unit Director   | <ul> <li>Approve design thinking problem statements</li> <li>Approve recommendations and implementation plan prior to circulating to ELT and service unit</li> <li>Meet with relevant stakeholders when required</li> </ul>  |  |
| Service Review Coordinator (SRC) Staff from Organisational Performance  | <ul> <li>Coordinate internal service reviews</li> <li>Collaborate with service unit staff, service unit stakeholders and other Councils to gather relevant data including benchmarking</li> <li>Generate insights and problem statements</li> <li>Report on implementation progress</li> </ul>                 |  |
| Service Review Group Service Unit Manager Team Leader/Supervisor (if applicable)  Design Thinking Team Service Unit staff | <ul> <li>Vet problem statements</li> <li>Vet and implement quick wins</li> <li>Liaise with relevant stakeholders when required</li> <li>Ideate solutions to problem statements</li> </ul>  |  |
| Staff from other Service Units (2-3)  | <ul><li>Identify additional issues</li><li>Develop and refine recommendations</li></ul>  |  |

Figure 2: Service Review Roles and Responsibilities

### Timeline

The service review timeline (Figure 3, below) aligns with the Integrated Planning and Reporting (IP&R) cycle. If there are significant changes proposed following a service review (e.g., service reduction or service cost increase outside of the annual budget), then the recommendations will generally be presented to the Council for approval to exhibit with the draft Operational Plan in May 2025. Approved changes will take effect on 1 July 2025 with the new Operational Plan and Budget.

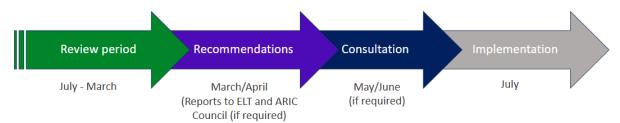

Figure 3: Service Review Program Timeline

If a recommendation requiring Council approval requires further staff engagement, research, or planning, and is not ready to be considered by Council in March/April, it may be delayed in order to align with the following IP&R cycle (if not urgent), or a separate report may be taken at any time.

### Framework

NSC's Service Review Framework aims to embed a culture of service excellence (through continuous improvement) to improve the effectiveness, efficiency, quality, and sustainability of services.

It incorporates methodologies from UTS Service Review Guide, Kaizen (e.g., continuous improvement cycles), and Design Thinking (e.g., user-centred problem solving). Team feedback and recommendations are organised by the five dimensions of NSC's progress (Balanced Scorecard + Sustainability).

Figure 4 (next page) outlines the four phases of NSC's Service Review.

Figure 4: Service review phases

Central to the framework is the inclusion of design thinking (phase 3), which provides an opportunity to challenge assumptions, understand user needs and allow service unit staff to contribute to collective problem-solving. It is widely acknowledged that design thinking encourages innovative thinking, communication and collaboration.

The design thinking process within the service review not only involves staff from the service unit but also invites two-three staff members from other service units to participate to ensure diverse perspectives, knowledge, and ideas are incorporated. In future service reviews, it is intended that staff who participated in the previous design thinking workshop will be invited to participate in the next to build connections and cohesion across Council teams.

During the service review pilot, it was found that implementing quick wins after staff feedback sessions in phase 2 provided numerous benefits. The small, incremental, and cost-effective changes suggested by staff could be quickly implemented. This approach helped reinforce a proactive mindset within the team and demonstrated management's responsiveness to addressing operational pain points.

### Service review recommendations

In March/April each year, ARIC (and Council, if a service reduction or service cost increase outside of the annual budget is proposed) will be provided with the service review report for each review undertaken in the financial year. This report will include an implementation plan that highlights key findings and recommendations.

# Monitoring and evaluation

An evaluation report will be provided to the ELT, ARIC, and Council in November/December each year to outline the benefits realised through implementation of review recommendations and highlight any implementation issues/challenges.

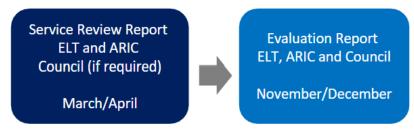

Figure 5: Monitoring and Evaluation Reporting Cycle

# **Consultation requirements**

Consultation forms an integral part of Service Reviews as highlighted in the framework.

# **Financial/Resource Implications**

Financial and resourcing implications will differ for each review undertaken. Based on the pilot review, it is anticipated that financial savings will be accrued through the service review program.

# Legislation

In accordance with essential element 4.3 of the legislated Integrated Planning and Reporting (IP&R) guidelines, councils must undertake a systematic review of services as part of their commitment to continuous improvement.

Further, the Office of Local Government advised that following the 2024 local government elections, it is expected that all councils will have a service review program in place to begin the new council's IP&R cycle.

The attached framework and associated service review program have been prepared in accordance with these requirements.

# **PURPOSE**

A service review is an internal process that considers the cost, quality, efficiency and effectiveness of a Council service. It assesses whether the quality and current levels of service remain appropriate.

Through this process, Council works with key stakeholders to develop agreed priorities and expected levels of service to ensure that resources are directed to where they are needed most.

A Service Review Framework (SRF) has been developed to guide the service review process at North Sydney Council (NSC) by establishing a standardised approach for how reviews are conducted, reported and evaluated.

3

# INTRODUCTION

NSC provides a wide range of services (external and internal). Most of these services meet an identified community need and/or are required by legislation.

NSC is committed to continuously reviewing and improving its services. This includes considering what services are provided, why they are provided, how they are delivered and the associated costs.

# **BACKGROUND**

The SRF details how NSC will undertake reviews as part of its Performance Management Framework and to comply with legislative requirements.

# Legislative requirements

Section 4.3 of the Integrated Planning and Reporting Guidelines stipulates that all Councils must undertake a systematic review of services as part of their commitment to continuous improvement.

# **Performance Management Framework**

NSC's overarching performance management framework has customer experience at its centre and consists of three separate frameworks that work together to sustainably deliver projects and services for the community.

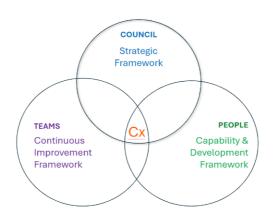

Figure 1: Performance Management Framework

The **Strategic Framework** focuses on identifying community needs. It is centred around community engagement and uses Informing Strategies to link community priorities with NSC's actions.

Figure 2: Informing Strategies

The **Continuous Improvement Framework** focuses on how each service unit plans to deliver NSC's strategic goals and achieve continuous improvement. This includes development of service unit plans as well as implementation of the *Service Review Program* (as detailed in this framework) and *Process Improvement Program*.

NSC's *Process Improvement Program* involves mapping and subsequent analysis of service procedures to identify and address inefficiencies and customer pain points.

The **Capability and Development Framework** focuses on how each staff member supports the delivery of service unit and NSC strategic goals.

# **ABOUT SERVICE REVIEWS**

# What is a service?

A **service** is an end-to-end process (or group of processes) that delivers a specific outcome to an internal or external customer. Some services are comprised of multiple activities that work together to deliver the outcome. These are referred to as **service activities**.

As detailed in Attachment 1, NSC currently has 16 service units (plus the Office of the CEO and Legal Counsel) that provide 74 services, with 205 associated service activities.

# What is a service review?

A service review is a process that considers the cost, quality, efficiency and effectiveness of a service. It assesses the ongoing need for the service and determines whether the current mode of delivery is appropriate. Using insights based on data and feedback, Council can make informed decisions about the services it delivers.

To achieve a wholistic and comprehensive understanding of the role and value of each service, reviews will generally occur at the service unit or service level. However, this framework can also be applied to reviews at the service activity level (if required).

### **Benefits**

Service reviews aim to embed a culture of continuous improvement by building the capacity of staff to think critically and creatively about current and future community needs through a balanced, transparent, collaborative and evidence-based approach.

The key benefits of a service review, as detailed below, address the five areas of NSC's progress (Balanced Scorecard + Sustainability):

- Learning and growth: Building staff capacity to deliver high quality and cost-efficient services to the community
- Internal processes: Maximising opportunities for innovation and transformation to improve Service Delivery
- Customer experience: Ensuring ongoing alignment of services with community needs and expectations
- Financial perspective: Ensuring value for money and the financial sustainability of services now and into the future
- Sustainability: Minimising adverse environmental impacts

# **Key considerations**

Each review should consider whether the service is:

- Fundamental to the business of local government, as specified by the NSW Local Government Act (1993) and other relevant legislation
- Aligned to Council's strategic goals
- Supporting fair and equitable access to services
- Financially viable for Council
- · Providing best value for money

# **Relationship with Internal Audit**

While both service reviews and internal audits aim to improve a council's overall performance, they approach improvement in different ways.

- Independent assurance and advice: Internal audits offer independent assurance on the effectiveness of internal controls and risk management, ensuring the council operates legally, efficiently, and effectively while also providing recommendations for improvement. Conducted in line with global standards, internal audits are overseen by the ARIC.
- Internally led continuous improvement: Service reviews are part of the organisation's continuous improvement program, focusing on intrinsic value delivery, customer satisfaction, and cost and efficiency objectives.

Given the synergies between internal audit and service reviews, it is essential that both the internal audit plan and the service review program are developed in alignment, ensuring coordination and avoiding unnecessary overlap.

# Roles and responsibilities

The following table outlines the key roles and responsibilities for delivering NSC's service reviews.

| Area  | Responsibilities   |
|---|--|
| Council   | <ul> <li>Adoption of the Service Review (SR) program via adoption of the<br/>Delivery Program and Operational Plan</li> </ul>                            |
|   | <ul> <li>Approval of recommendations that involve a reduction in a service<br/>or additional costs outside of the existing budget</li> </ul>             |
| Audit Risk & Improvement Committee (ARIC)       | Review progress updates and provide advice as required   |
| Executive Leadership Team (ELT)                 | Framework adoption   |
|   | Development of the schedule and program  |
|   | Define scope for each review   |
|   | <ul> <li>Approval of recommendations that do not require Council approval</li> </ul>   |
|   | Review of recommendations that require approval from Council   |
|   | Allocation of resources  |
| Service Unit Director                           | Approve design thinking problem statements   |
|   | <ul> <li>Approve recommendations and implementation plan prior to<br/>circulating to ELT and service unit</li> </ul>                                     |
|   | Meet with relevant stakeholders when required  |
| Service Review Coordinator                      | Coordinate internal service reviews  |
| (Organisational Performance)                    | <ul> <li>Collaborate with service unit staff, service unit stakeholders and<br/>other Councils to gather relevant data including benchmarking</li> </ul> |
|   | Generate insights and problem statements   |
|   | Report on implementation progress  |
| Service Review Group                            | Vet problem statements   |
| Service Unit Manager Team Leader/Supervisor (if | Vet and implement quick wins   |
| applicable)                                     | Implement other recommendations once approved by ELT/Council   |
|   | Liaise with relevant stakeholders when required  |
| Design Thinking Team                            | Ideate solutions to problem statements   |
| Service Unit staff                              | Identify additional issues   |
| Staff from other Service Units (2-3)            | Develop and refine recommendations   |

Figure 3: Roles and responsibilities

# **Timeline**

NSC will operate under a four-year service review program with 2-3 reviews to be undertaken each financial year.

The service review timeline (see Figure 3) aligns with the Integrated Planning and Reporting cycle. If there are significant changes proposed, such as a service reduction or an increase in service cost outside of the annual budget, these recommendations will be presented to Council with the draft Operational Plan in April. Approved service changes will then take effect on 1 July with the new Operational Plan and Budget.

Figure 4: Service review timeline

If a recommendation requiring Council approval requires further staff engagement, research or planning before presentation to Council (April), the report to Council may be delayed to align with the following IP&R cycle or a separate report may be presented to Council at another time.

# **SERVICE REVIEW APPROACH**

# Service review phases

The Framework below incorporates methodologies from UTS Service Review Guide, Kaizen (e.g., continuous improvement cycles), and Design Thinking (e.g., user-centred problem solving). Team feedback and recommendations are organised by the five dimensions of NSC's progress (Balanced Scorecard + Sustainability).

Figure 5 (below) outlines the four phases of NSC's Service Review.

Figure 5: Service review phases

# Phase 1. Identify - develop service review program

To ensure service reviews are completed in a systematic manner, a service review program is required for NSC.

# 1.1. Identify current services

NSC currently has 16 service units (plus the Office of the CEO and Legal Counsel) that provide 74 key services (refer Attachment 1). These are a mix of internal and external services.

Service catalogues must be updated every four years prior to the new Council term or when changes have been implemented after a service review.

# 1.2. Prioritise reviews

In accordance with the Integrated Planning & Reporting Guidelines, this step should be undertaken in conjunction with the development of each new Delivery Program (DP) and subsequent Operational Plans (OP), with the agreed four-year service review program included in the DP and the priorities for each financial year included in the annual OP.

Service reviews require a significant investment of time and resources, so consideration must be given to prioritising reviews based on a range of factors including:

- community satisfaction levels
- expenditure/cost
- risk
- service utilisation
- changing/emerging trends
- legislative requirements
- · staff resourcing
- service gaps

Service Review Framework

11

A four-year service program (with a minimum of two reviews scheduled per year) must be prepared for inclusion in each new DP. Ad hoc requests for additional service reviews (outside the adopted program) may be considered by the ELT.

# 1.3 Define scope

The ELT will determine the scope for each review. When developing the scope, the following questions should be considered:

- What is to be included in the review?
- Are there any aspects of the service/service unit that should be excluded from the review?
- Which stakeholders (internal and/or external) should be engaged?

The proposed scope should be defined by the ELT before the review is started. In some circumstances the ELT may determine that external resources (e.g. specialised consultants) are needed to undertake the review.

# Phase 2. Discover - Undertake service review

Following the creation of the service review program and scope definition, individual service reviews can be undertaken.

# 2.1 Gather and analyse data

This step involves identifying, collecting and analysing relevant data to address broad questions such as:

- Is the community satisfied with the service? If not, why?
- How efficient and effective is the service delivery?
- What are the current challenges and opportunities for the service?
- What might the long-term strategic options be for the service?

The Service Review Coordinator will use the Discovery Template (refer Attachment 2) as the basis to gather:

- Financial details (current and previous budgets)
- Service utilisation statistics
- Customer and community views
- Feedback from relevant staff and stakeholders
- Service baselines
- Benchmarks against similar Councils and/or other organisations (if appropriate)
- Work practices and processes
- Service Level Agreements (SLAs)
- Technologies and systems
- Audit/consultant reports (if available)

# 2.1.2 Engage with stakeholders

Stakeholder engagement is an important part of a service review program. Targeted stakeholder engagement may be required during the review process. The extent and type of stakeholder engagement for each separate service review will depend on a range of factors including:

- The service being reviewed (internal or external)
- The amount of data available from previous surveys and/or other stakeholder engagement activities

If targeted engagement is required, then Organisational Performance will work with Council's engagement team.

# 2.2 Develop problem statements

After analysing datasets, recurring issues can be grouped into larger themes. These themes help to quickly understand major pain points/bottlenecks, which can then be distilled into quick wins (refer 2.3) and complex challenges (refer Phase 3). Problems statements can then be crafted from the complex challenges. Problem statements usually include:

- Who (e.g., Council residents)
- What (e.g., high dissatisfaction levels)
- Impact (e.g., increased complaints)
- Goal (e.g., how can we be more responsive?)

# 2.3 Action quick wins

Quick wins are a crucial element of the SRF as they enable the service review group to act on small cost-neutral and achievable improvements straight away. These small changes help foster a culture of continuous improvement within teams.

# Phase 3. Ideate – generate solutions to complex problems

After implementing quick wins, the next phase involves using design thinking to enable staff to create solutions for more complex challenges and make recommendations.

### 3.1 Generate solutions

Once problem statements have been developed, they will be vetted by the Service Unit Director and/or Service Unit Manager and presented to the design thinking group. The ideation process is based on design thinking methodology (see Attachment 3). The ideation process may also expose further challenges (not raised in feedback sessions), which are included in the ideation process.

Once solutions have been captured and discussed within the design thinking teams, the Service Review Coordinator will group recommendations under the five dimensions of NSC's progress (Learning and growth, Internal processes, Customer experience, Financial perspective + Sustainability).

Figure 6: Ideation Process Figure

# 3.2 Approve recommendations

The Service Review Coordinator will meet with the relevant Director, Service Unit Manager and Team Leader/Supervisor (if applicable) to review proposed recommendations, actions, timeframes and potential impacts on team structure, training, process changes, customer experience and cost beyond the current budget. Relevant stakeholders (e.g. People and Culture, Information Technology, Finance, Governance) may also be consulted for feedback or further advice before the service review report is finalised.

A service review report with recommendations and an implementation plan (refer attachment 4) will be presented to the following groups in order:

- 1. Executive Leadership Team
- 2. ARIC
- 3. Council for approval (if required\*)
- \* If a recommendation results in a reduction in service level or an increase in cost beyond the current budget, the proposed change must be presented to the Council for approval. In most cases, a proposed reduction in service level will also require public consultation before approval.

Figure 7: Engagement and approval requirements

Generally, Council approval would be sought in April as part of the annual Operational Plan preparation/adoption process. Notwithstanding the above, recommended service changes may be referred to the Council at other times.

# Phase 4. Implement and evaluate

The final phase involves implementing changes, monitoring and reporting progress.

# 4.1. Implement changes

Once the recommendations have been approved, all changes will be implemented in accordance with the implementation plan attached to the service review report.

The implementation plan identifies:

- Recommended changes to policies, processes, service levels and/or resources
- Who is responsible for implementation of each recommendation
- Timeframes for delivery
- Key metrics for evaluating impact of improvements

Quarterly implementation progress updates will be provided to the Service Review Coordinator by the Service Unit Manager and/or supervisor to allow for early identification and management of potential issues.

### 4.1.1. Documenting changes

Service changes need to be documented as part of growing organisational capacity and capturing new knowledge. Depending on the level of change, updates to documentation may include processes, service catalogues, operational manuals, intranet or website content, and service level agreements to record:

- New and changed services
- New and changed service activities
- Changes to policies and processes
- Changes to organisational structure
- New or changed agreements with service providers
- New or changed relationships with other Councils and/or organisations

# 4.2. Monitor and evaluate

Evaluation helps NSC assess the effectiveness of reviews and communicate their benefits to stakeholders.

In March each year, the ELT and ARIC will receive a service review report for each review conducted that financial year. This report will include an implementation plan outlining key findings and recommendations.

Within 6–9 months of the service review report being presented to the ELT and ARIC, an evaluation report will be provided to the ELT, ARIC, and Council. This report will summarise the benefits realised from implementing the review recommendations and highlight any challenges or issues.

The evaluation report for a service review will include:

- Service changes delivered through the implementation process (including any changes to KPIs)
- Changes in customer satisfaction levels
- Value created by the changes
- Actual costs or savings resulting from implementation
- Issues or challenges, along with actions to address ongoing concerns

The evaluation report will also assess the effectiveness of the service review process (as detailed in the Framework) and identify any necessary changes.
